

THE TYBURN
PRIVATE MEDICAL PRACTICE

A HIGHLY
PERSONALISED
PRIVATE
GENERAL PRACTICE

WELCOME

TO THE TYBURN

The Tyburn is a private family General Practice in central London's world-renowned medical district. Led by Dr Adam Hazell we offer highly personalised healthcare for you and your loved ones.

Dr Adam Hazell and his small, handpicked team, managed by Alison Lewin, are dedicated to building strong relationships, based on trust and respect. We make every effort to provide a calm, relaxed and unpressured environment to discuss any health concerns. We emphasise a positive and proactive approach to your health and wellbeing.

Dr Adam Hazell is an accomplished family doctor with extensive medical experience and has founded The Tyburn to provide his patients with a comprehensive primary care service. We are with you through every step of your patient journey, whether with our team or supporting you through ancillary care from our network of outstanding medical specialists.

At The Tyburn we value the importance of continuity of care and understand that many patients are looking for a long term family doctor as a "keeper of their story" and knowledge of their circumstances inside out. It is our aim for all patients to feel cared for, valued and know that they have a strong advocate in their corner, willing to go the extra mile for their health when it is needed. We look forward to welcoming you to The Tyburn.

Dr Adam Hazell
Director and Clinical Lead

Alison Lewin
Practice Manager

THE TYBURN

The Tyburn is situated in Marylebone, in the heart of London's world renowned medical district on Upper Wimpole Street. The building is attached to the London Heart Centre and has facilities to undertake a full range of medical investigations, if required. We pride ourselves on being able to work closely together with the top medical specialists in the country in order to support our patients' health needs.

DR ADAM HAZELL

Dr Adam Hazell is a highly experienced private General Practitioner having graduated from the University College London Medical School in 2007 and worked on London's Harley Street since 2016. He has a great passion for his role as a family doctor and the privilege that comes from getting to know and treating patients. Dr Hazell's experience covers a broad range of medical specialities from geriatrics to managing COVID-19.

Dr Hazell's specialist interests are in musculoskeletal medicine (joint and muscle problems), sports injuries and occupational health. He gained a diploma in sports and exercise medicine from the University of Bath and is currently in the process of completing a master's degree in this field. This has given him a firm foundation in the field of health promotion and preventative medicine. Through his experience on Harley Street he has strong links to world-class orthopaedic surgeons, sports doctors and physiotherapists if referral is required.

WHAT WE OFFER

A FAMILY DOCTOR FOR YOU AND YOUR LOVED ONES

At The Tyburn we offer easy and flexible access to a comprehensive primary healthcare service, whether in clinic or via telephone and video consultations. Our appointments with Dr Adam Hazell are tailored to you, typically lasting 30 or 60 minutes.

Our GP appointments can usually be arranged the same day, at a time that is convenient to you, including evenings and early mornings. For longstanding patients we can also arrange 15 minute face-to-face, phone or video consultations.

Dr Hazell is truly interested in seeing and treating the individual and not just a list of medical problems. He feels that excellent bedside manner separates the great doctors from the good. It is vital for establishing the special relationship that exists between a doctor and patient and is fundamental to delivering exceptional care.

You can book an appointment online using our live booking tool or alternatively call the practice to arrange an appointment.

We offer repeat prescriptions through a concierge service and can have them delivered to your home or local chemist, to take the headache out of managing your prescriptions.

WHAT WE OFFER

WELL MAN

A complete overview of your health and wellbeing.

Our Well Man health check offers a deeper understanding of your current health status, as well as identifying any possible medical concerns for the future. Highly experienced in treating men's health issues, Dr Adam Hazell delivers a flexible and confidential service that aims to give you more control of your health. Suitable for men of all ages, the screening will be adapted to you, as certain tests are usually only necessary for men in specific age ranges. Dr Hazell can then offer personalised advice and support in making any necessary lifestyle changes.

REFERRALS

A network of world-class specialists at your fingertips.

With over 35 years of Harley Street contacts and connections, we pride ourselves on offering referrals to the top medical specialists in the country. We then work closely together to support our patients and to share their care. The Tyburn is attached to the London Heart Centre and has facilities to undertake a full range of cardiac investigations, from echocardiograms (ECGs) to exercise tests.

SEXUAL HEALTH

Fast, flexible and discreet sexual health service in central London.

The Tyburn offers a complete sexual health service for both men and women to provide you with peace of mind. Dr Adam Hazell welcomes all patients, and your information will not be shared with anyone else.

WELL WOMAN

A positive, proactive approach to your health and wellbeing.

With all the pressures of modern-day life, it can be challenging to make time for yourself, but a Well Woman screening is an essential investment in your health and wellbeing. Whether you wish to address any specific concerns you may currently have or want a routine check, The Tyburn's Well Woman is designed to screen for any indicators of illness or conditions that require management at the earliest possible stage.

DIAGNOSTICS

Providing a complete picture of your health at our central London GP clinic.

Gaining a thorough overview of your health status can assist you in making fully informed medical decisions. At The Tyburn, we offer immediate, in-clinic access to many tests or can arrange all other necessary scans at some of London's leading diagnostic centres, often on the same day. Dr Adam Hazell will always carefully explain why he feels these tests are necessary.

CORPORATE HEALTH

A dedicated GP keeping your workforce well.

Depending on your company's unique needs, we will develop a customised Corporate Healthcare package to suit you and your business. We'll provide everything from GP services for management to flu vaccines for the whole company.

COVID-19 SERVICES AT THE TYBURN

COVID-19 TESTING

The Tyburn offers a COVID-19 PCR Swab test to determine whether you have a current Coronavirus infection. We do not offer an in-surgery swab test, this must be taken at home or Dr Hazell can visit you.

We provide the Abbott COVID-19 antibody test that has been validated to offer the highest level of accuracy. This detects the IgG antibody to SARS-CoV-2 and indicates whether you have already had the virus.

ACUTE COVID

Dr Adam Hazell has extensive experience in dealing with Acute COVID-19 having spent six months working in a West London hospital exclusively on the virus.

If you are suffering from COVID-19 Dr Hazell will set up virtual or telephone ward and check-in with you every 24 hours to monitor your symptoms and establish if escalation is required.

LONG COVID

The NHS now recognises Long COVID as a medical condition which can leave sufferers with months of debilitating symptoms.

With clinical experience in this field, Dr Hazell is already helping those with Long COVID to return to work and manage their daily lives. The key to success is to explore both the physical and psychological aspects of the illness.

POST COVID MOT

Our understanding of COVID-19 is constantly evolving, but it is clear that for weeks and months after the initial infection, some people continue to suffer persistent symptoms.

The Tyburn offers a personal assessment of your general health and can provide ongoing management of any chronic health concerns.
